# Table of Contents

Cooperation in massively distributed information space <i>Olav W Bertelsen and Susanne Bodker</i>	1
Adaptability of classification schemes in cooperation: What does it mean? <i>Carla Simone and Marcello Sarini</i>	19
Finding patterns in the fieldwork <i>David Martin, Tom Rodden, Mark Rouncefield, Ian Sommerville, and Stephen Viller</i>	39
Team automata for spatial access control <i>Maurice H ter Beek, Clarence A. Ellis, Jetty Kleijn, and Grzegorz Rozenberg</i>	59
Supporting distributed software development by modes of collaboration <i>Till Schummer and Jorg M Haake</i>	79
Flexible support for application-sharing architecture <i>Goopeel Chung and Prasun Dewan</i>	99
Creating coherent environments for collaboration <i>Christian Heath, Paul Luff, Hideaki Kuzuoka, and Keiichi Yamazaki</i>	119
Spaces of practice <i>Monika Buscher, Preben Mogensen, and Dan Shapiro</i>	139
Collaboratively improvising magic: An approach to managing participation in an on-line drama <i>Adam Drozd, John Bowers, Steve Benford, Chris Greenhalgh, and Mike Fraser</i>	159

Music sharing as a computer supported collaborative application <i>Barry Brown, Abigail J Sellen, and Erik Geelhoed</i>	179
PolyLens: A recommender system for groups of user <i>Mark O'Connor, Dan Cosley, Joseph A Konstan, and John Riedl</i>	199
Why do we love text messages? <i>Rebecca E Grinter and Margery Eldridge</i>	219
Coordinating heterogeneous work: Information and representation in medical care <i>Madhu C Reddy, Paul Dourish, and Wanda Pratt</i>	239
Cognitive properties of a whiteboard: A case study in a trauma centre <i>Yan Xiao, Caterina Lasome, Jacqueline Moss, Colin F Mackenzie, and Samer Faraj</i>	259
On finding things out: Situating organisational knowledge in CSCW <i>Kristina Groth and John Bowers</i>	279
The effects of network delays on group work in real-time groupware <i>Carl Gutwin</i>	299
Community support and identity management <i>Michael Koch and Wolfgang Worndl</i>	319
Reducing interference in single display groupware through transparency <i>Ana Zanella and Saul Greenberg</i>	339
Harnessing complexity in CSCW <i>Simon Kaplan and Lesley Seebeck</i>	359

Decentralizing the control room: Mobile work and institutional order <i>Oskar Juhlin and Alexandra Weilenmann</i>	379
When worlds collide: Molecular biology as interdisciplinary collaboration <i>Vicki L O'Day, Annette Adler, Allan Kuchinsky, and Anna Bouch</i>	399
Index of authors	419

## From the Organizers

This volume represents the proceedings of ECSCW 2001, the 7th European Conference on Computer Supported Cooperative Work. ECSCW is an international forum for interdisciplinary research activities from various technical and social disciplines. The conference alternates with the ACM International Conference on CSCW to provide annually a principal forum for CSCW research.

This year the German CSCW community takes pride in organizing ECSCW. The establishment of a German research community reaches back to the early 1990s. In 1991 the first German speaking CSCW conference was organized in Bremen by Jürgen Friedrich. Since then, a biannual conference series, called DCSCW, developed. It brought together researchers from Human Computer Interaction, Distributed Systems, Information Systems, Humanities and Social Sciences. While academics often acted at the edges of their home disciplines, government funds at the European, federal, and state level helped creating research groups with international reputation. Industry picked up on the results to innovate products and processes. Recently the CSCW community decided to join forces with other fields of applied Computer Science as well as industrial designers to shape a newly created conference series called *Mensch & Computer*.

The ECSCW program of technical papers presented in this volume is the result of a very selective review process. This year the conference received 109 submissions of very high quality from which 21 papers were selected. Both the number of submissions and the quality and diversity of the program presented here are testimony to the importance the CSCW community has gained. We are sure that you will enjoy the papers in this volume.

The papers in this volume are only one aspect of a diverse and dynamic event such as ECSCW. The technical paper program is complemented by a record number of 10 workshops, high quality tutorials, demonstrations from industry and academia, and posters representing research in progress. These events reflect some of the most exciting and novel aspects of CSCW research and practice. They are essential to the success of the conference and the continued growth of the community.

This conference could not have taken place without considerable enthusiasm, support, and encouragement as well as sheer hard work. Many people have earned the thanks of those who attended and organized ECSCW 2001. In particular, we would like to gratefully thank.

- All those who submitted to the conference. The standard was very high and reflects well on the research work in the community.
- All of those who contributed to the conference through workshops, tutorials, posters, demos, and paper presentations.

- All of those who contributed to the organization of the conference. Planning a major international conference is a complex endeavor and many people made significant contributions to realizing a successful conference.
- The Student Volunteers who work so tirelessly during the conference to ensure things run smoothly.
- Those members of the Conference and Program Committees who gave so freely of their time and energy to ensure that the conference was both smoothly run and of high technical quality. The many individuals we owe our thanks to are listed elsewhere in this volume.
- The many sponsors and supporters of ECSCW 2001 for their contributions to the conference and to the CSCW community generally.

We would also like to acknowledge the organizers of the ACM CSCW conference for the support and encouragement they extend to this conference. The close cooperation between ECSCW and the ACM CSCW conferences allows us to continue the growth of a truly international research community tackling the problems crucial to CSCW. Between both conferences we have been able to establish an annual international conference on CSCW for the last decade charting the development and maturity of the discipline. The future appears to hold considerable promise for us all.

Matthias Järke, Wolfgang Prinz, Yvonne Rogers, and Volker Wulf

# ECSCW 2001 Conference Committee

## Conference co-chairs

Wolfgang Prinz, GMD-FIT, Germany

Volker Wulf, GMD-FIT, Germany

## Program co-chairs

Matthias Jarke, RWTH Aachen,  
Germany

Yvonne Rogers, University of Sussex,  
UK

## Proceedings chair.

Kjeld Schmidt, Technical University of  
Denmark

## Tutorials co-chairs

Peter Carstensen, IT University  
Copenhagen, Denmark

Tom Gross, GMD-FIT, Germany

## Workshop co-chairs

Jorg Haake, GMD-IPSI, Germany

Andrew McGrath, Hutchison 3G, UK

## Demonstrations chair

Stefan Uellner, T-Nova, Germany

## Video chair

Johannes Bumiller, Daimler Chrysler  
Research, Germany

Jean Schweitzer, Siemens, Germany

## Posters chair

Markus Rohde, Agenda Consult,  
Germany

## Student volunteer co-chairs

Michael Koch, TU Munich, Germany

Volkmar Pipek, University of Bonn,  
Germany

## Doctoral colloquium co-chairs.

Liam Bannon, University of Limerick,  
Ireland

Tom Rodden, University of  
Nottingham, UK

## Electronic media support

Wolfgang Grather, GMD-FIT, Germany

Leonie Schäfer, GMD-FIT, Germany

## Local arrangements

Helge Kahler, University of Bonn,  
Germany

## Conference office

Christine Harms, ccHa, Germany

## Liaisons

### North America

Wendy Kellogg, IBM, USA

### Australia

Geraldine Fitzpatrick, University of  
Queensland, Australia

### Japan

Ken-ichi Okada, Keio University, Japan

### South America

Jacques Wainer, Universita de  
Campinas, Brasil.
